CHRISTIANACARE
DEPARTMENT OF PATHOLOGY AND LABORATORY MEDICINE
LABORATORY SERVICES TEST CATALOG

INTRODUCTION

This Laboratory Services Test Catalog provides general information on the Department of Pathology and Laboratory Medicine and detailed instructions on the correct procedures for collection and transport of specimens to be submitted to the laboratory. All current policies and procedures are reviewed and approved by the current Laboratory Director or designee at least every two years. All new or revised policies are reviewed and approved by the current Laboratory Director or designee before implementation. The Test Catalog describes laboratory policies and will aid in communication between the department and other services.

This Laboratory Services Test Catalog has been expanded to include the full test menu for both ChristianaCare and Mayo Medical Laboratories. **Use the Test Catalog link below to access the search areas for a list of tests performed here at Christiana Care Laboratory and Mayo Medical Laboratories.**

Use the "Search for Test" area to locate specific test information. When the search is complete all tests fitting the category will be listed. Click on the test you wish to view to bring up the details. If you encounter problems in using the website, please contact Angie Slayman at 302-733-3730.

The physician sectional directors and clinical scientists are available for consultation on the appropriate application of the tests listed in the Directory, and you are encouraged to make use of their expertise. Their contact information is located under the Administrative-Management Staff section of the General Information Tab.

This Directory is the product of the efforts of several members of ChristianaCare and Mayo Medical Laboratory staff; their contributions are gratefully acknowledged.

Sincerely,

Mary V. Iacocca, M.D.,
Chair, Department of Pathology and Laboratory Medicine
