

Outpatient Laboratory Services

Outpatient laboratory services are provided in six locations at ChristianaCare. Routine blood testing, urinalysis and routine urine cultures do not need to be scheduled. Glucose and lactose tolerance test scheduling may be done by calling the area that the patient will be going to for the test. The patient will need a written order from the health care provider specifying the procedures they want performed and the associated diagnoses. Any outpatient work ordered stat requires a contact phone number or fax number for result communication.

The patient will be asked to provide their name, address, and insurance information when they register at the location.
